Automated Trading Bot Returns Overview (2025)

This report summarizes estimated average returns and compounding effects for the three main autom
trading platforms discussed — Mizar, 3Commas, and Pionex — based on 2025 data and user reports.
These figures are approximations for planning and demonstration purposes only.

Platform Comparison (Estimated Returns)

Mizar:
- No public data available, but ranges likely similar to peers.
- Expected annualized range: 20%–50% depending on strategy.
- Performance fee for copy-trading leaders: 5–50% of follower profits.
- Referral program: up to 45% of trading commission lifetime payout.

3Commas:
- Average monthly returns: 2%–10% (approx. 0.07–0.3% daily).
- Compounded annualized return: ~60%–214% based on strategy.
- Affiliate payout: 25–40% commission on subscriptions (lifetime).

Pionex:
- Daily return range: 0.07%–0.15% (≈2–4.5% monthly).
- Compounded annualized return: ~26%–37% for moderate bots.
- Affiliate payout: 20% on spot trading, 15% on futures.

Compounding Examples (Illustrative)

Assuming conservative bot return ~3% per month:
- Starting capital: $10,000
- Monthly growth: 1.03x
- After 12 months: ≈ $14,300 (+43% annual return)

Aggressive bot return ~8% per month:
- Starting capital: $10,000
- Monthly growth: 1.08x
- After 12 months: ≈ $25,000 (+150% annual return)

These examples demonstrate how small daily/weekly gains can
compound significantly when profits are reinvested.

Important Notes:

- Results depend heavily on market conditions, strategy, and risk management.
- Compounding assumes profits are continuously reinvested without drawdowns.
- Past performance is not a guarantee of future results.
- These figures are intended for illustrative and business-planning use only.
